

Car Bike Port (Lite)

1 car space = 10 bicycles

Did you know that one car parking space can provide cycle parking for 10 bicycles?

The Car Bike Port Lite is an innovative bike parking solution that fits into a standard car parking space. Its eye catching design sends out a clear message that bicycles are more space efficient than cars. This innovative product features a galvanised stainless steel body and racks and is anchored to the ground with bolts, reinforcing its robust design.

Its flat pack construction is easy to assemble and is simple to transport making it an ideal solution for temporary cycle parking at events.
