

# Semi Vertical Racks

Save floor space with the semi vertical rack duo

The Semi Vertical Racks are sturdy space saving cycle racks with secure locking loops. The clever design saves floor space by storing bikes, you guessed it, semi vertically. Making them ideal for places where higher density cycle parking is required.

We offer a single sided version, the Semi Vertical Rack or double sided, the X Semi Vertical Rack. They are easy to use, simply lift the front wheel of your cycle onto the bottom trough, roll it up the channel and use the locking loop to secure your bike.

## Features

- Space saving cycle storage solution.
- Racks can be configured to store any number of cycles.
- Bicycle frames lock to rack using lock loop.
- Suits all bike types up to tyre width 64-70mm.
- High density rack spacing of 305mm.
- Suitable as a free standing rack.
- High-low rack configuration reduces handlebar clash.
- Suitable for outdoor use.
- Secures to flat, solid ground with bolts.
- Made using good-quality recyclable materials.
- 10 Year warranty on design and 1 year on parts.
- Designed and manufactured in the UK.

To cater for less able bodied people or heavier bikes, we recommend providing Sheffield Stands or similar alongside this product.

The wide trough fits all common types of bicycles, including mountain bikes and other bicycles with wider tyres.

This rack is made from robust galvanised steel, recyclable and suitable for outdoor use. It is secured firmly to the ground with bolts.

## Options
