

Cycle Shelter

The robust Cycle Shelter is a zero maintenance design suitable for any site providing storage for 10 bikes.

Protecting bikes from the rain preventing premature rusting, the cycle shelter is constructed of galvanised mild steel and fitted with a clear polycarbonate UV stable roof with side panels.

Its modular system accommodates multiple configurations increasing its options for installation.

Specification

4100 × 2100 × 2200mm (Dimensions for 10 bikes)

Perimeter gap: 150mm max.

Steel construction with anti-vandal clear PET UV stable roof and side panels

Bolt-down or ground embedded fixing with adjustable feet

Each cycle shelter holds 10 bicycles

Modular design allows for multiple configurations

Plain galvanised steel or polyester powder coated finish options

Optional lockable mesh or polycarbonate gate

Made in Britain
