

# Clear Bike Canopy, Shelter and Compound

Outdoor • Weather resistant • School • Workplace • Public • Private

**Our range of shelters, canopies and compounds can be tailored to meet your needs. From secure, private cycle parking through to open access for the wider public, our experienced sales team can help you choose the perfect product.**

Built for all weathers and designed to last, the framework for this range of products is constructed from strong steel box section. This comes as galvanised steel or can be custom powder coated to match your organisation branding.

With a PETG thermoplastic skin, the transparent membrane provides natural light and visibility, blocking 100% of harmful UV rays and letting in 98% of the light. This protects the stored cycles from weathering and corrosion by the elements – keeping saddles dry on rainy days! In cases where safety and security are paramount – for example in schools – being able to see inside the structure can provide peace of mind.

Plus, with a strength 175x greater than glass, the skin provides excellent vandal resistance.

These products can be adapted to suit site limitations and user requirements, with their modular design allowing you to select a capacity that fits your needs. With Toast Racks coming as standard, you can also select from other racks and stands to enable the parking of non-standard and adapted cycles.

### Universal features

- Protects bikes from weathering and corrosion
- Anti-vandal, UV-proof PETG thermoplastic panels
- Ideally installed on concrete pockets – speak to a member of the team to understand foundation requirements
- Internal Toast Racks provide secure cycle parking spaces – option for Sheffield Stands or structure only
- Modular design allows products to be expanded
- Galvanised steel or custom powder coated finish
- Available flat-pack or fully assembled and installed
- Ten year guarantee
- Made in the UK

## Clear Bike Canopy

A roof only shelter that provides overhead cover from the elements. When placed in the open, the Canopy allows users to access from all sides. Placed next to a wall it offers front access only. It is available in single and double row options, with capacities tailored to match your requirements.

### Product specific features

- Available single or double rows
- Surface mount or root fixed with adjustable feet

### Example dimensions (model dependent)

- Height: 2422mm
- Length (10 spaces): 4120mm
- Depth: 2638mm

## Clear Bike Shelter

Providing cover on three sides with the option of a gate on the fourth, the Bike Shelter can be configured as a secure or open structure. You can choose from the cost-effective hinged swing gate or a sliding gate which is suggested when space is restricted.

### Product specific features

- Open fronted or closed
- Lockable sliding gate or hinged gate to suit your space
- Gate available in mesh or PETG thermoplastic
- Surface-mount or root fixed with adjustable feet
- Parks 10 bikes, can be extended to park 20, 30 or 40

### Example dimensions (model dependent)

- Height: 2200mm
- Length (10 spaces): 4100mm
- Depth: 2100mm

## Clear Bike Compound

A fully enclosed, weather resistant space for locations requiring a locked structure. Ensure cycles are protected from the elements with this compound that doesn't obstruct views.

### Product specific features

- Surface-mount or root fixed with adjustable feet
- Hinged lockable gate
- Padlock, mechanical coded lock or swipe card lock options
- Parks 20 bikes, can be extended to park 40 or 60

### Example dimensions (model dependent)

- Height: 2098mm
- Depth: 4872mm
- Length (20 spaces): 4100mm

## Delivery and installation UK-wide

All products are available flat pack, delivery only or fully assembled and installed by our trained and experienced team.
