

Deluxe Bike Repair Station

Indoor

Outdoor

Public use

Workplace

University

A complete bike maintenance solution for public spaces.

Encourage cycling uptake by equipping your premises with a Deluxe Bike Repair Station.

Paired with the Compact Public Bike Pump and Wheel Holder, the Deluxe Bike Repair station provides all the tools necessary for everyday cycle maintenance tasks.

Whether you're topping up the tyre pressure, adjusting the brakes or tightening a loose bolt, our industry-leading design makes the tools available at a convenient point in the bike journey.

Ideal for bike storage spaces, cycle destinations and transport hubs, the repair station is built for the rigours of outdoor installation and continuous public usage.

The repair station features a robust steel and alloy construction with a durable powder coated finish.

Both the pump and station have the option to be custom powder coated to match your organisation's branding scheme.

Key features

- RAL 7047 Telegrey 4 powder coat as standard
- Minimal ground fixings
- Replacement parts available
- 2 year warranty

Product options

- Compact public Bike pump with integrated hose
- Wheel holder with laser cut spoke motif
- Custom powder coating in a range of RAL colours
- Custom vinyl branding decals
- Delivery and installation

Dimensions

- **Height:** 1408mm
- **Width:** 216mm
- **Depth:** 530mm

Nine high quality tools cover the all the basic maintenance tasks on a wide range of bikes. Retracting steel cables keep them secure and out of the way when not in use.

- Phillips screwdriver
- Flathead screwdriver
- Steel core tyre levers x2
- Headset/pedal wrench
- 8/10mm cone wrench
- 9/11mm cone wrench
- Torx T-25
- Allen key set

Optional compact bike pump

With a stainless steel construction, a steel braided hose core and an impact resistant gauge cover, the Compact Public Bike Pump offers the ease-of-use and high PSI rating of a track pump with the durability required for long term public usage. The dual port pump head caters for both Presta and Schrader valve types.

Optional wheel holder

The wheel holder mounts directly to the repair station, requiring no additional ground fixings. It provides a convenient place to support the bike without lifting it on to the mounting arms. Simply slot the wheel into the housing. The laser cut tyre and spoke motif adds a premium look and subtly directs the user.

In use

Cycle maintenance made easy

In use, bikes are lifted off the ground by mounting arms with protective plastic sleeves. The bike can be hung from the top tube or by the seatpost under the seat. This allows the drivetrain and wheels to turn; great for tuning gears, finding punctures or fixing chain issues. Nine high quality tools are attached to retractable cables with security fixings to prevent theft while allowing reach and movement.

The optional wheel holder helps accommodate heavier bikes and those without a top-tube or access to the seat post.

Built for long term public use

The Deluxe Bike Repair Station is designed for outdoor installation in all conditions. The steel body is impact resistant and the durable powder coating protects against corrosion.

The tools are manufactured with high grade steel for an extended lifespan, and all components are replaceable.

Service options

Custom Branding

The Deluxe Bike Repair Station, optional pump and wheel holder can be powder coated in any RAL colour. Additional branding can also be applied with vinyl decals.

Installation and Maintenance

The Deluxe Bike Repair Station is available for delivery or can be installed by our team. Our installers are CSCS trained and are supervised by a SSSTS qualified Project Manager. We also offer maintenance contracts for regular servicing.

Available on the NHS framework

The Deluxe Bike Repair Station is an approved product on the NHS Sustainable Transport and Infrastructure Framework, allowing public sector organisations to bypass lengthy and expensive procurement processes. For more information, contact us at info@cyclehoop.com.
