

# Car Bike Port

An iconic bike rack that promotes cycling

**The Car Bike Port is an iconic piece of street furniture that boldly demonstrates the space efficiency of cycling. It delivers ten locking points for cycles in one car space and provides a strong message about the positive impact of cycling.**

The racks are made from recyclable mild steel with a durable nylon powder-coat finish that protects bike frames from scratching. The curved shape

provides secure, three-point locking for the bike frame and both wheels.

Easy-to-assemble the Car Bike Port is an ideal solution for both permanent and temporary cycle parking. Its colourful and eye-catching design promotes green mobility and can help assess demand for additional infrastructure.

Our Car Bike Port is designed and made in the UK and is perfect for use on-street, at cycling events and at universities or hospitals.

## Features

- Fits ten cycle parking spaces in one car space
- Made using high-quality recyclable materials
- Modular for easy transport and quick installation
- More cost-effective than traditional methods
- Protects users and cycles from traffic
- Wheels and frame lock to the cycle rack

- Free-standing or securely bolted to the ground
- Designed and manufactured in the UK
- 10 year limited warranty

## Options

- Available in yellow, orange, green, blue or black
- Custom branding and colours available

## Materials

**Racks:** Recyclable mild steel, nylon powder-coated

**Body:** Recyclable aluminium, polyester powder-coated

## Lead time

Powder-coated to order, if not in stock available in 6-8 weeks

## Dimensions and installation

**Length:** 4100mm **Depth:** 1375mm **Height:** 1375mm

### Installation method

Car Bike Ports are securely bolted into the ground with expanding ground anchors, or threaded rods fixed with chemical anchoring adhesive and secured with shear nuts. They can also be used free standing as temporary cycle parking at events.

## Options

### Available in five standard colours

Select from one of our five standard Car Bike Port colours: yellow, orange, green, blue or black. The body is polyester powder-coated and the racks are nylon powder-coated to prevent bike frames from scratching.

### Custom colours and branding

Have your Car Bike Port painted in an eye catching custom colour, or detailed with a custom vinyl design that communicates your brand. Inquire with our friendly sales team for a quote.

## Supply only or fully assembled and installed, with worldwide shipping available

Car Bike Ports come flat-packed for cost effective shipping, with easy to follow assembly documents. Our installers are CSCS cardholders and are NRSWA trained, they are supervised by a SSSTS qualified project manager.

## Hire a Car Bike Port for an event

Car Bike Ports are a great way to promote cycling and green mobility at events. They deliver a strong message about the positive effects of cycling. Each unit provides ten secure parking spaces and the large car icon highlights the space efficiency of cycling. Speak to our sales team about availability today.
