

# Mesh Bike Shelter

The Mesh Bike Shelter is an extremely secure and robust bike storage unit for 10 bicycles. This high security shelter is made from galvanised or powder coated steel and is clad with mesh exterior which allows easy surveillance of the bikes. This product has the option of being clad with prison mesh which is designed so that it cannot be cut through with bolt cutters. Optional secure padlocks can be used to lock the gates.

The Mesh Bike Shelter is ideal with Sheffield Stands enabling the users to lock up their bikes individually and offering more protection against theft and vandalism.
