

# Metal Bike Shed

Our Metal Bike Shed is an exceptionally strong and secure shelter designed and manufactured to offer optimum protection against theft and vandalism.

Bikes are stored in the cycle shelter in multiples of four, behind substantial weld mesh doors, secured via 5 levers, twin bolt euro profile mortise deadlocks.

## Technical Specification

- Secure metal cycle shelter with pitched roof.
- Infinite capacity to store any number of cycles in multiples of four.
- Cycle shelter comes with lockable mesh swing gate per module.
- Steelwork – Fully hot dipped galvanised to ISO1461.
- Polyester powder coating – All popular RAL colours available.
- Roof, back & end elevations finished in solid steel plastisol coated cladding.
- Steel galvanised corrugated dividing panels to isolate individual bays.
- Doors clad with matching solid steel plastisol cladding in lieu of weldmesh.
- Made in Britain

## Dimensions for a 10 space unit:

- Height at front 2440mm (96.1 inches)
- Height at back 2000mm (78.8 inches)
- Width per module 1600 mm (63 inches)
- Depth 2225 mm (87.6 inches)
