

Cyclehoop HD

The award-winning Cyclehoop HD converts existing signposts into secure cycle stands for 2 bicycles, preventing thieves from lifting locked bicycles over the top. This innovative design allows cyclists to lock through the frame and wheels stopping the bike from falling over.

The Cyclehoop HD is easy to install and ideal for retrofitting to existing street furniture, making it great for locations where normal cycle stands cannot be installed and where pavement space is limited. This product is made from cast ductile SG iron and is fitted with a neoprene rubber lining to prevent scratching to the lamppost. The Cyclehoop HD is Sold Secure Bicycle Gold and Secured by Design.
