

PRODUCT BROCHURE

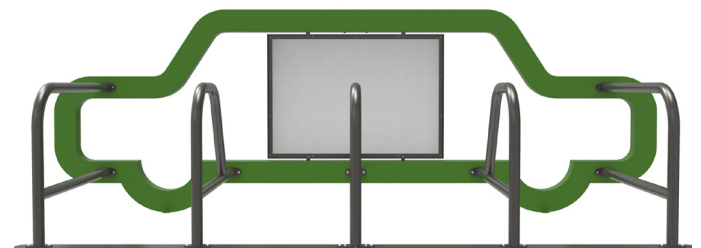

4100mm x 1302mm | Weight: 120kg

The Car Bike Port is an eye-catching cycle parking solution that provides space for 10 bicycles in a standard car parking bay. The bold outline of a car demonstrates the space efficiency of bikes. This product is easy to transport, assemble and install, making it a great solution for both temporary and permanent cycle parking.

Features

- 10 spaces (5 racks per unit)
- Anchored into the ground with bolts
- Acts as a barrier to protect parked bicycles from cars
- Fun shaped cycle parking
- Flat pack design, simple to transport and install
- Great for both events and permanent cycle parking

10 bikes in one parking space

Easy to assemble
