

Public Bike Pump

cyclehoop

PRODUCT BROCHURE

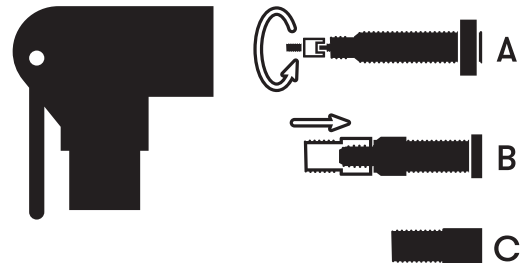

268mm x 920mm | Weight: 15kg

The Public Bike Pump is a heavy duty product that can be installed anywhere, providing a free facility to pump up deflated tyres, making it perfect for locations with a high concentration of cyclists. This product features a dual pump head that fit Presta, Dunlop and Schrader valves, accommodating most bikes. Its robust design minimises maintenance, making it an ideal solution for any public place.
